GTB™ ET GAS-TIGHT SUIT

LAMINATE VITON®

Description

The fully encapsulating GTB is a Type 1A - ET enhanced robustness reusable gas-tight suit covering both the wearer and breathing apparatus.

Laminate Viton[®] consists of a polyester fabric coated one side with orange fireproof DuPont[™] Viton[®] and one side with grey thermoplastic with an insert barrier film, which results in a suit that is lighter in weight than conventional reusable suits and provides advanced chemical protection.

Applications

Petro-Chemical

Certification

TYPE 1A | EN 943-2:2019 (ET) Gas-Tight Chemical Protective Suits for Emergency Teams

Material Performance

FINABEL 0.7.C **Chemical Warfare Agents**

EN 14126:2003 Protective Clothing Against Infective Agents

Product Documentation

The CE Certificate, Declaration of Conformity and user instructions can all be downloaded from the product page on the Respirex website, links are in the downloads tab.

There are also additional photos and videos on donning procedure.

Key Features

Encapsulating design for Self Contained Breathing Apparatus (SCBA) worn inside the suit

Gas-tight zip running from side of head to lower thigh, covered by double zip flap with hook & loop fastener

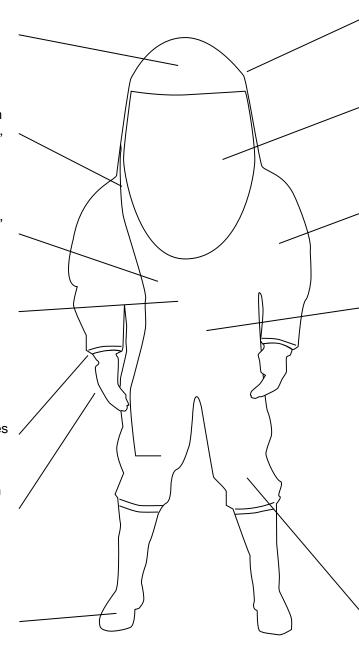

Protection against liquid & gaseous chemicals (**Type 1**), infective agents and chemical warfare agents

Inward Leakage tested to EN 1073-2:2002, Class 3 with a Nominal Protection Factor (NPF) >9090

Gas-tight locking cuff system for changing gloves

Dual glove system consisting of a **Kemblok™ chemical barrier inner glove** bonded to an **outer neoprene glov**e for mechanical protection.

Choice of fixed or detachable chemical safety boots or sock feet (see below)

Two exhalation valves maintain a comfortable working pressure inside the suit

Chemically resistant, laminated, rigid visor providing clear undistorted vision and a wide field of view

Bat-wing sleeves allow wearer to remove their hand from the glove to check gauges and other equipment inside the suit

Adjustable internal support belt

Fifteen year shelf-life, with internal pressure test required annually or after each use

Internal pressure test based on ISO 17491-1:2012 (Clause 5.3, Method 2) conducted before despatch to confirm the suit is gas-tight

Foot or Boot Configuration

Sock Foot and Outer Leg

A sock foot of the suit fabric is fitted with an outer splash guard leg, allowing the use of customers own heat & flame resistant chemical safety boots (required as par of EN943-2). This also reduces pack size.

Detachable Boots

Detachable **Hazmax™ FPA** heat and flame resistant chemical safety boots are attached by a locking ring and can be replaced during suit servicing.

Fixed Boots Hazmax[™] FPA heat and flame resistant chemical safety boots are permanently attached to the suit. The suit needs to be returned to Respirex for boot replacement.

Suit Options

Fall Arrest

Fall arrest facility for use with an internal fall arrest harness with a back D ring fixing and used in conjunction with a retractable type fall arrester

Suit/Brigade ID

Customer Identification names & codes can be added to the base of the visor or on the back of the suit.

Anchor Hook External equipment attachment point

.

Suit Ventilation (GTVB Model)

Adjustable ventilation system for the arms and legs of the suit, fed from the wearers BA set. Adjustable in steps from 0 to 100l/m from a control valve mounted on the chest.

Pass-Through

Allows the connection of a second cylinder or an air-line to the second man attachment on the wearers breathing apparatus during decontamination.

Personal Line Attachment

External equipment attachment point

DSU Attachment

External equipment attachment point for a Distress Signal Unit (DSU)

Torch Ring Attachment

External equipment attachment point

Accessories

Hazbag Containment Bag

A hazardous material containment bag manufactured from ChemprotexTM 300 material. Supplied with a cable tie, tag and wallet for sealing and identification. Dimensions: 1050 x 1370 mm

Training Suit

A training version of the operational suit manufactured in green PVC and designed for multiple re-use with no testing required.

Suit Care & Maintenance

A selection of suit care products including cleaning and deodorising agents, anti-fogging spray for visors and lubricating wax for zips.

Gas-Tight Suit Test Unit -

Computer controlled test unit that automatically inflates a suit from a compressed air supply and performs an internal pressure test to ISO 17491-1:2012

Manual Gas-Tight Suit Test Box

Operator controlled test unit that can be used to inflate a suit from a compressed air supply and perform an internal pressure test to ISO 17491-1:2012

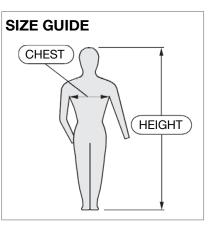

Disposable Outer Visor

Tear-off outer visor held on by hook and loop pads. Provides additional mechanical and chemical protection.

The test results indicate the resistance to permeation by chemicals of the material, seams, glove liner and suit visor as required by EN943-2:2019. All tests were carried out under laboratory conditions by independent accredited laboratories in accordance with BS EN ISO 6529 unless otherwise stated

For full details of the chemical permeation performance of VL and its performance against chemical warfare and infective agents, please visit the materials section of the Respirex website **www.respirex.com**.
