

SECUMAX EASYSAFE

THE BLADE IS CONCEALED. THE ADVANTAGES ARE OBVIOUS.

THE SAFER WAY TO CUT.

martor

SECUMAX EASYSAFE

NO. 121001

85% of original size

For people and goods

The concealed blade provides reliable protection to you and your goods. And your company? It benefits too, naturally. Productivity is high when everything goes smoothly.

4-times usable blade

Why do you benefit more from your blade? With its four sharp edges, it can be rotated four times. That's why. The result? Blade life is quadrupled and you stay sharp for longer.

Ergonomic handle

Your cutting tool never leaves your hand? Then it is even more important that it is as comfortable as possible, and that it causes as little fatigue as possible. The ergonomic handle is designed with you in mind.

Lockable blade

This cutter is lockable. With a specially shaped key, you can lock it, and thereby prohibit blade change. This is a particularly interesting feature for all conscientious work places.

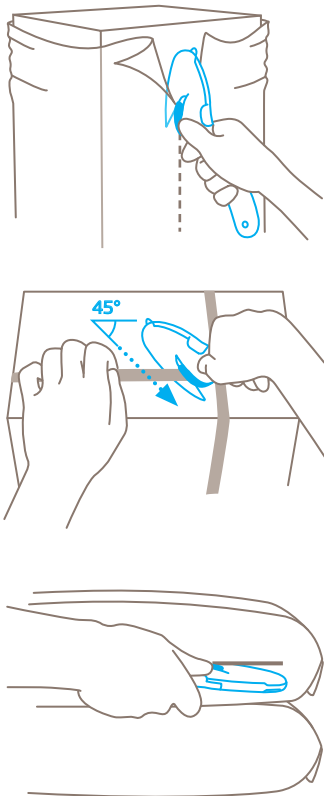

For packaging tape

You might be wondering what the small metal plate on the top side of the SECUMAX EASYSAFE does... Try it out! Set the plate against the tape of a taped box, apply enough pressure to piece the tape, and slice!

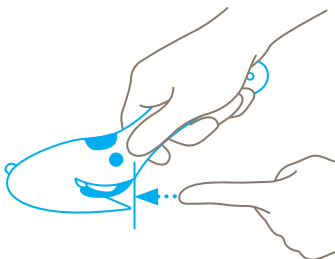

It's all easy. It's all safe.

The SECUMAX EASYSAFE convinces with its special features. The prominent and pointed nose of the cutting tool easily pierces plastic sacks and foil-wrapped pallets. The concealed blade easily cuts the sacks and foil. An integrated plastic 'material-guide' makes cutting thin film and paper sheets easier; even individual layers won't jam. And thin textiles and plastic strap-ping? No problem for the concealed blade!

Application

Safety technology

Concealed blade – a maximum degree of safety

The SECUMAX EASYSAFE blade is not an open one, but is hidden from people and goods. This provides you with a maximum degree of safety from cut injuries and from damage to goods.
