CU-13

Seat Cushion

Experience Value

With the cushion, you may enjoy the long sitting due to it always keep your bottom cool and comfortable.

Designed Idea

The inflatable cushion is not only designed for decubitus prevention but also for household use. Every air cell is connected to each other sharing the air flow. They can help to balance the sitting pressure and position, keep your bottom cool and comfortable. With the cushion, you can sit for longer time with less pain due to the air-cell-based technology supporting.

Provide Protection

The innovative design of the air cell cushion will let you immerse yourself in comfort. By distributing gravity evenly throughout the bottom, it can prevent your skin and soft tissues being oppressed effectively just with an affordable price. More sizes available to meet with your different requirements.

Specifications

Includes	CU-13 seat cushion, standard cover, hand inflation pump, repair kit, and operating instructions.
Construction	PVC / TPU
Sizes Available	16" x 16" (41cm x 41cm) 16" x 18" (41cm x 46cm) 17" x 17" (44cm x 44cm) 18" x 18" (46cm x 46cm) 20" x 18" (51cm x 46cm)
Height	2.75 in./ 7cm without load
Weight Limit	315 lbs (143kg)
Weight Limit Description	There is a weight limit of 315 lb. 143kg), and the cushion must be properly sized to the individual.
Warranty	12 Months Limited Warranty

CU-17

Single Compartment Cushion

This cushion provides an optimal environment for individuals with skin/soft tissue integrity issues

The cellular design and pliable material allow individual to be immersed themselves into the cushion to decrease friction and get maximum pressure redistribution. It fits individual's shape with cushion adjustment, minimizing tissue deformation and facilitating blood flow.

Skin Protection

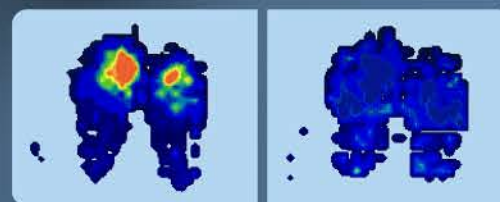

With 50 years of research experience, the cushion can provide unparalleled performance in facilitating blood flow by fitting, matching and tracking the individual's shape.

Shape Fitting

The cushion can follow and track movement of the body constantly with unique cellular design. By simple adjustment and conformity of the cells accommodates, it can meet the requirement of everyone's unique skin/soft tissue integrity all day long.

Convenience

All postural adjustments are affecting while the user is sitting, eliminating the need of transfer on and off the chair during the evaluation process.

YHMED adopts the Dynamic Pressure Monitoring System to trace the real-time internal pressure of the cushion.

CU-17 Seat Cushion provides the best support and decompression effect for the user.

Adjustable

The cushion can be adjusted to individual's shape and weight, while it can also change in individual's position over time.

Portable

Easy to handle and carry, with just 3 lbs./1.5 kg.

Washable

With machine washable cover and the cushion can be easily cleaned with soap and water.

Repairable

The flame-resistant, black silica gel cushion can be patched to extend its service life.

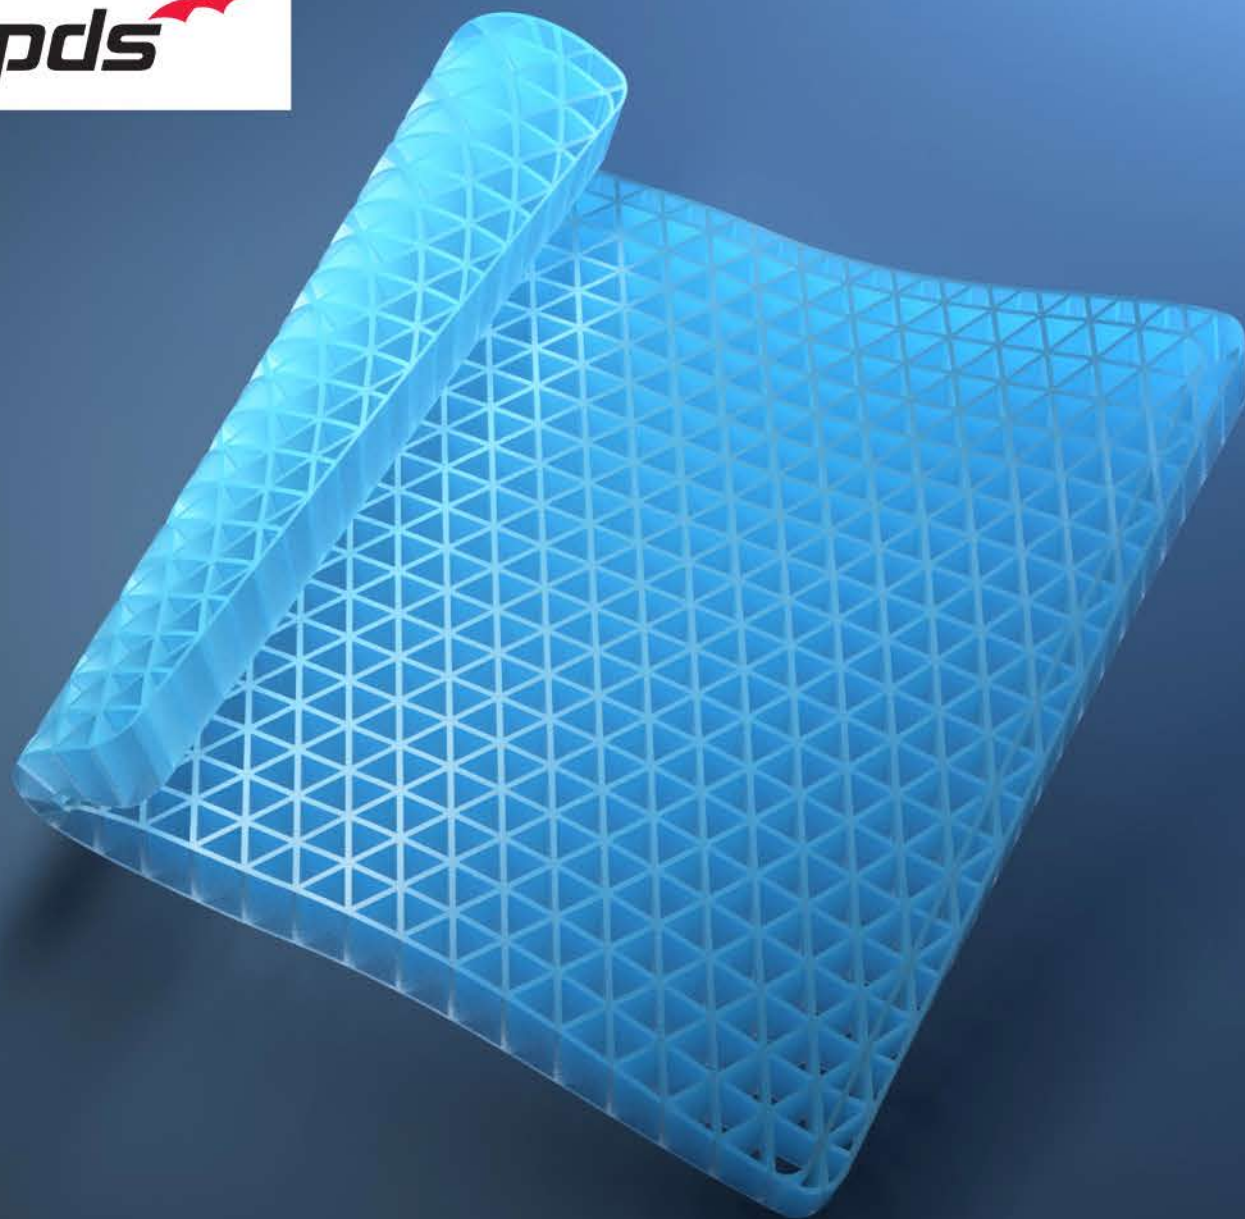

Based on the evidence of clinical, scientific or engineering, the cushion may be suitable for individuals who:

- Have a history of skin/soft tissue breakdown and/or any stage pressure injury (including deep tissue injury), skin grafts, and/or myocutaneous flap surgery.
- Prevention or treatment of skin/soft tissue breakdown and/or any stage pressure injury (including deep tissue injury).
- Feel impaired.
- The requirement of pelvic asymmetry accommodation, up to approximately 2.75in/7cm.

Specifications

Construction	flame-resistant, black silica gel
Includes	CU-17 Single Compartment Cushion, mesh cover, hand inflation pump, repair kit and operation instructions.
Size	17"×17" / 43cm×43cm
