

A GOOD DAY
AT WORK
STARTS WITH
MYSOLE WORK

We spend a great part of our lives at work - reason enough to try to make it enjoyable and where possible to be as comfortable as possible.

Good, comfortable shoes are especially important for people whose work involves a lot of walking and standing

Each individual foot and every situation may need special, particular consideration. But working footwear is made in bulk and is standardized. Boot manufacturers put a lot of time and money into the development of work footwear, but all too often they neglect the insole.

To "tune" the shoe to the individual foot, in the best possible manner, MySole – working closely with foot professionals – have developed a new range of insoles under the brand "MYSOLE™ WORK".

The MYSOLE™Work program comprises a range of very high quality insoles developed to deal with a number of specific applications. They are in effect accessories which up-grade footwear and are suitable for a wide range of people and applications. By combining innovative, responsible and anatomical design and the use of superior materials, comfort is enhanced, a perfect support for the foot is achieved and injuries to the feet and the rest of the body are reduced. A correctly selected insole can even reduce sick leave and extends the life of working footwear. In short the MYSOLE™ Work programme is an excellent development for both employees and employers.

MYSOLE WORK

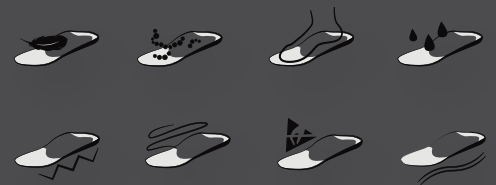

MYSOLE™ HIGH ARCH

The MYSOLE™ High Arch insole is specially developed for the pes cavis or "hollow" foot. The elevated support prevents underfoot discomfort so you can still enjoy your day at work.

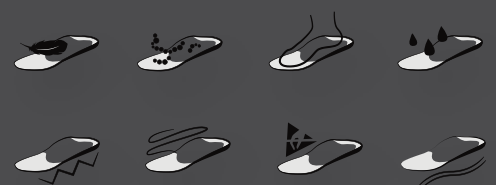

MYSOLE™ MEDIUM ARCH

The MYSOLE™ Medium Arch is developed for the normal foot. The insole provides sufficient support for pleasant comfort throughout the day.

MYSOLE™ LOW ARCH

The MYSOLE™ Low Arch is developed specifically for people with flat feet. The shallow support is the feature of the insole.

MYSOLE™ FOOTDISC

Determine the foot type and correct shoe size in just 10-15 seconds.

The MYSOLE™ Footdisc can be used in combination with the MYSOLE™ Low, Medium and High Arch insoles.

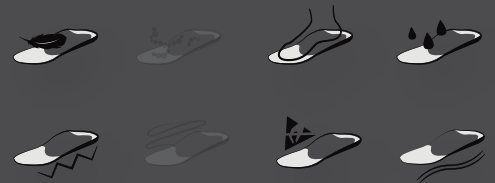

MYSOLE WORK

MYSOLE™ SHOCKABSORPTION

The MYSOLE™ Shockabsorption insole is specially developed for work footwear. This insole has very high shock absorption qualities. The unique design provides support for the rear- and mid-foot, optimum pressure relief, and well-distributed shock absorption. This insole is very comfortable and is the perfect choice for people who stand and walk a lot during their working day.

MYSOLE™ ANATOMICAL

This sock is designed for people who stand and walk a lot at work and who need extra stability and/or shock absorption. MYSOLE™ Anatomical gives optimal support to the rear- mid- and fore-foot. This insole is also anti-static and reduces foot odours. MYSOLE™ Anatomical ensures maximum walking comfort.

TIPS AND TRICKS

- Remove the MYSOLE™ insoles from your shoes as soon as you take them off. Then let the insoles breathe: the sweat evaporates. This will increase the life of your insole and enable the insoles to absorb as much moisture as possible every time you use them - and it helps avoid cold feet when you put your shoes back on.
- Never put MYSOLE™ removable insoles on or near a heat source, Heat may deform your insoles and any leather component may shrink or crack.
- If some moisture remains in the MYSOLE™ insoles because there is only a short time between wearings, it is recommended to wear an alternate pair.
- Clean the MYSOLE™ insoles regularly with lukewarm water and a soft cloth.
- It is highly recommended that a deodorant or other similar product be used on MYSOLE™ insoles.
- For best results from your MYSOLE™ removable insoles, it is important to fasten your shoes properly.
- Over time the beneficial effects of MYSOLE™ removable insoles may diminish depending on their use, and the weight of the user. It is important that the insoles are replaced in good time.
- If your MYSOLE™ removable insoles do not perform as well as expected, you may need to consult a foot professional.
