### Training & Proper Use

1. While holding the stem, reach a hand over your head and gently pull top of your ear up and back.
2. Insert the earplug so all flanges are well inside your ear canal.
3. If properly fitted, the tip of the earplug stem may be visible to someone looking at you from the front.
4. Proper Fit – If either or both earplugs do not seem to be fitted properly, remove the earplug and reinsert.
5. Removal – Gently twist earplug while slowly pulling in an outward motion for removal.
6. Acoustical Check – In a noisy environment, with earplugs inserted, cup your hands over your ears and release. Earplugs should block enough noise so that covering your ears with your hands should not result in a significant noise difference.

### Additional Information

#### CARE + MAINTENANCE

- INSPECT - Prior to fitting, examine your earplugs for dirt, damage, deformation or extreme hardness. Discard immediately if compromised.
- CLEAN - Wash Multiple-Use earplugs with mild soap and warm water only. Pat dry with a towel and store in a case when not in use. Do not treat with any other substances, as the earplug may degrade and compromise use.
- HYGIENE - With proper maintenance, Multiple-Use earplugs can last for 2-4 weeks.
