LEIGHT

## **HL400 Earplug Dispenser**

Your Choice in Hearing Protection

# EASY EARPLUG DISPENSING

The Honeywell HL400 Earplug Dispenser is built for lightweight, durable convenience. With a simple twist of the knob, it dispenses any Howard Leight disposable foam earplug. Better yet, refilling and mounting the dispenser are just as easy.

The canister is a level 7 polycarbonate blow-mold and is recyclable\*

## Hearing protection close at hand

Allow employees easy access to hearing protection – and make sure that the choices are specifically matched to the work environment. Place dispensers by the shop door or in the lunchroom, and employees can access a new pair of earplugs as they enter the workspace.

\* some local recycle programs do not accept level 7, check with your local regulations first

# A SELECTION OF HIGH QUALITY EARPLUGS

## It's all about choice

When it comes to protecting your hearing, **Howard Leight leads the industry** by offering the most choice of in-ear hearing protection. Howard Leight's disposable foam earplugs provide the right fit for every user in every environment from different sizes, shapes, and materials to attenuation levels that accommodate both personal preferences and specific applications.

Offer a **variety of earplugs on the job** – not just one type of earplug for the entire team. The Max disposable earplugs are the world's most-used polyurethane foam earplugs and are designed for maximum protection in high-noise environments. The Max Lite, Laser Lite and Max Small disposable earplugs are intended for smaller ear canals. Howard Leight's no-roll FirmFit earplugs offer an option for easier insertion. The tapered design of the X-TREME earplug offers the comfort while providing protection. **Choose the protection that best fits your workers.**

**MAX®**  
Superior noise-blocking performance  
**NRR33**  
Canada Class A (L)

**MAX® Small**

One size fits many  
**NRR31**  
Canada Class A (L)

**X-TREME™**  
Tapered design for  
comfort and protection  
**NRR32**  
Canada Class A (L)

## PRE-FILLED OR REFILL

### It's all about choice

To ensure sufficient stock of suitable hearing protectors is available, Howard Leight offers two convenient ways to keep your dispenser full. Choose pre-filled canisters of 400 earplugs, or zip top bags of 200 earplugs to refill the dispenser.

Earplug dispensers offer a cost-effective solution to outfitting many workers with hearing protection, saving money while eliminating waste. The canisters are a level 7 blow-molded recyclable plastic, which can be recycled just like a water bottle, making it an economic benefit. To be more environmentally friendly, choose the zip top bag of earplugs, and refill your stock by reusing the canister.

#### Plug N Play

Prefilled canister contain 400 pairs of earplugs

#### Refill as Needed

Refill bags contain 200 pairs of earplugs

#### Less spillover during refill

The new flat top design of the canister allows you to place the canister upright for easy refilling with minimal waste. The wider neck opening on the canister allows for ease of refilling with earplugs- no point of congestion, and less potential waste of earplugs falling out onto a contaminated surface.

## The importance of being protected

Noise-induced hearing loss (NIHL) is one of the most common occupational injuries in the United States.

22 million US workers are exposed to hazardous noise at work on a daily basis.

Occupational hearing loss costs an estimated \$242.4 million per year in disability alone.

Approximately 9 million Americans suffer from NIHL.

NIHL is 100% permanent. But it's also 100% preventable.

# TABLE TOP OR WALL MOUNT

## It's all about choice

The HL400 base is able to fit on existing wall mounts of other dispensers, including the Howard Leight LS400, as well as competitor mounts. The universal hole positions match many other dispensers, eliminating the need to drill new holes. The table base can also be mounted to a horizontal surface to ensure stabilization and prevent movement.

## Refill and assembly

### Step 1:

Remove canister from dispenser base. Turn upside-down and then remove canister lid. Refill canister with bag of Howard Leight disposable earplugs.

### Step 2:

Once canister is full (up to 400 earplugs), snap canister lid back onto canister. You will hear a click sound to assure it is back in place.

### Step 3:

Flip canister right side up and gently insert back into dispenser base. Arms of dispenser base will click when canister is properly inserted.

**Now easier than ever!**

**ORDERING INFORMATION**

It's all about choice

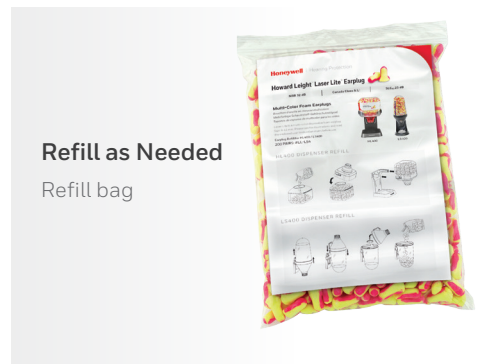

GET STARTED - dispenser with prefilled canister				
Part No.	Description	NRR	Canada Class	Case Qty
HL400-MAX-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. MAX earplugs	33 dB	A(L)	1 dispenser and 1 canister per case
HL400-MAXS-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. MAX Small earplugs	30dB	A(L)	1 dispenser and 1 canister per case
HL400-LPF-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. MAXLite earplugs	30 dB	A(L)	1 dispenser and 1 canister per case
HL400-LL-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. Laser Lite earplugs	32 dB	A(L)	1 dispenser and 1 canister per case
HL400-FF-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. FirmFit earplugs	30 dB	A(L)	1 dispenser and 1 canister per case
HL400-MM-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. MultiMax earplugs	31 dB	A(L)	1 dispenser and 1 canister per case
HL400-XTR-INTRO	HL400 Dispenser with 1 prefilled canister of 400 prs. X-TREME earplugs	32 dB	A(L)	1 dispenser and 1 canister per case

PLUG N PLAY - refill canister				
Part No.	Description	NRR	Canada Class	Case Qty
HL400-MAX-REFILL	Prefilled canister of 400 prs. MAX earplugs	33 dB	A(L)	2 canisters per case
