

Neoprene-dipped coating on a double insulating liner for improved resistance in hot conditions

- The glove combines the flexibility and chemical resistance of neoprene with the comfort and heat resistance of a soft thermal liner.
- The glove is designed to protect the users in applications where thermal and chemical risks are present.

Industries

- Machinery and Equipment
- Metal fabrication
- Chemical

Applications

- Press work
- Handling materials with sharp or rough edges
- Production line support & maintenance
- Charging and blending raw materials
- Unexpected leakages spills or other releases

Key Features

- Neoprene glove with a double insulating liner to better resist to heat and cold environment
- Designed to protect the users in applications where thermal and chemical risks are present
- Excellent mechanical and chemical properties. Unaffected by detergents and cleaning solutions. Excellent protection against greases and oils. Superior flexibility and grip
- Comfortable insulating double liner. Provides protection from intermittent contact with hot surfaces up to 180°C

Vulcanization Chemical Accelerators

- Diphenyl guanidine
- Diphenyl thiuram urea

Only a very small number of users may be sensitive to this ingredient(s) and hence may develop irritant and/or allergic contact reactions.

Performance Standards
