DIRECTIONS FOR USE:

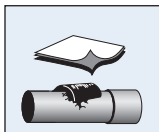

Ready to use; sets in about 30 minutes at 75°F.

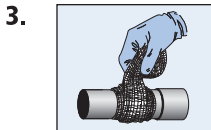

Release water pressure from pipe. Clean and roughen area to be repaired.

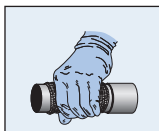

Joint Repair: Break off a piece of putty and twist and knead until blended. Roll into a rope or ball and place firmly into joint or crack. Feather edges with wet fingers.

Pipe Repair: Remove adhesive backing from Butyl Patch and firmly press patch directly over break.

Wearing gloves (included), remove Pipe Wrap from foil pouch. Soak in temperate water for 20 seconds. Tightly wrap entire roll of wrap about 2" above repair to 2" below.

Squeeze and mold Pipe Wrap in the direction of wrap, removing excess water and spreading resin until tacky to touch. Wait 30 minutes before reapplying water pressure.

Contents: Putty Stick, Pipe Wrap, Butyl Patch, Protective Gloves

Precautions:

SKIN IRRITATION: The resin used in Pipe Wrap will adhere to skin and may cause skin irritation. Protective gloves should be worn while handling. Care should be exercised to avoid contact in unprotected areas of skin and eyes. Swabbing lightly with alcohol or acetone will help in removing resin from skin (prior to set). Flush eyes with water for 15 minutes and then contact physician.

Store in cool place.
