Elvex® Visor Bracket VB-50

Anodized aluminum construction, ideal for metal foundry and high heat applications.

Product Features:

- Strong ratchet spring holds visor firmly in the up or down position.
- The overhead center position feature balances and distributes the weight of the shield evenly in the 'up' position.
- Made of aluminum providing a combination of high strength and impact resistance. Holds the heaviest of visors on the market.
- Recommended for use with Gold and Weld Shade shields.
- Ideal to use with non slotted safety helmets.
- Designed to mount on most face shields with "universal" hole pattern.
- Item No. VB-50
