

# Horizontal Life Line System

## Horizontal, temporary system HONOROPE-T®

In many different situations while working on height a permanent installed HLL is not necessary or too costly. Than a quick and simply to install temporary HLL is ideal. The HONOROPE-T offers safe move ability to the users in a horizontal plane (25 meters) and, combined with Lanyards, Miniblocs or Fall Arrest Blocks, even up to 3-dimensions. Maximum end loads are very low, only 7,7 kN.

HONOROPE-T components are: 1) special developed 25 meter long, very flexible, **kernmantel rope**, eyelet on one side through HoPress®, 2) Stainless Steel **Rope Vice Tensioner** for rapid installing, 3) two pear shaped Scaffold Hooks (quicklock), 4) optional pulley block (for Fall Arrest Block) and bag to complete the kit.

### Technical specs:

- Max. span: 25 meters
- Max. 5 users/system
- Rope: 16 mm kernmantel, static (art.no: R010.330.004)
- Eyelet in rope (1x): HoPress 16 mm (art.nr: R010.330.007)
- RVT (1x), SS, 16 mm (art.nr: R010.330.007)
- Scaffold hook (2x), quicklock, type C734 (art.nr: R024.001.005)
- According: EN-795 class C
