

HEAD & FACE PROTECTION

The hard hat has come a long way since the late 1800s. First inspired by military helmets, today's safety helmets are constructed of sturdy High Density Polyethylene (HDPE), Acrylonitrile Butadiene Styrene (ABS) or fiberglass. Offering great protection against falling objects, our head protection products are tested according to Singapore's SS98:2005 safety standard.

Faceshields protect your face from impact, chemical and heat hazards. Our faceshields meet a variety of safety standards including ANSI Z87.1, CSA Z94, EN166 and AS/NZS 1337. Combine them with our safety eyewear for added protection!

DO YOU NEED A SAFETY HELMET?

HELMETS & BUMP CAPS

SURFLEX BUMP CAPS

The removable ergonomic protective shell composed of abs polyvac provides maximum safety and comfort using stabilizers, anti shock foam cushioning, ventilation points and an anti sweat band. The light weight machine washable nylon shell with large side ventilation panels provides optimum comfort, with an adjustable velcro strap for easy adjustment.
